

D-Link DSL-G225

Please follow the steps below to set up your D-Link DSL-G225.

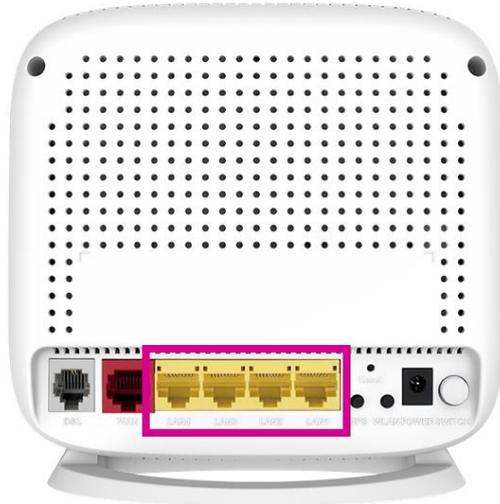

1. Plug a phone cable from your telephone wall socket into the **grey DSL port** on your D-Link modem.

2. Plug in the power cable and turn your D-Link modem on using the **Power** button.

3. You can connect devices such as PC desktops, laptops or gaming consoles by plugging Ethernet cables from the device to any of the four **yellow LAN ports**, or you can connect devices via WiFi.

4. Go to **http://192.168.1.1** in your browser.
5. Log in with your D-Link modem username and password.
By default, these are:
Username: admin
Password: admin
6. On home screen, select **Setup Wizard**.
7. Complete Step 1 **Change Device Login Password** and make note of the new password.
8. Complete Step 2 **Set Time and Date** for your location.
9. Select **VDSL** as the **WAN Service Type**.
10. Select **Australia** from the **Country** drop-down.
11. Select **TPG** from the **Internet Service Provider** drop down.
12. Select **PPPoE** from the **Protocol** drop-down.
13. Enter your **TPG username** and **password**.
14. Select **Next** and continue with the Wizard in setting up your WiFi.
15. Select **Save/Apply** at the end of the Wizard.

Once you receive notification that your TPG NBN service is active, your D-Link DSL-G225 should now be online. If you are still having issues, please call us on **1300 997 271** for further assistance.
